

**U.S. Fish and Wildlife Service
Division of International Conservation**

**MARINE TURTLE CONSERVATION FUND
NOTICE OF FUNDING AVAILABILITY**

CFDA 15.645

I. DESCRIPTION OF FUNDING OPPORTUNITY

The Marine Turtle Conservation Fund is soliciting proposals for the conservation of marine turtles (*Chelonia mydas*, *Caretta caretta*, *Dermochelys coriacea*, *Eretmochelys imbricata*, *Lepidochelys olivacea*, *Lepidochelys kempii*) throughout their range outside of the United States. The U.S. Government enacted the Marine Turtle Conservation Fund of 2004 in response to the decline of many marine turtle populations worldwide and the serious threats to the long term survival of marine turtle populations. The primary purpose of the Act is to provide financial support for projects that conserve nesting populations and habitat and address other threats to the survival of marine turtles in foreign countries.

The Marine Turtle Conservation Fund supports projects that promote the conservation of marine turtles by focusing on:

- Academic and technical training in the conservation and management of marine turtles;
- Applied research on marine turtle populations and their habitats, including surveys and monitoring;
- Conservation education and community outreach for the protection of nesting and near shore foraging populations;
- Development and execution of marine turtle conservation management plans;
- Habitat conservation and management;
- Information exchange to promote international collaboration;
- Projects to protect nesting females and eggs on important nesting beaches;
- Promotion of networks, partnerships and coalitions that assist in the implementation of conventions, treaties, protocols and other international activities for the conservation and management of marine turtles;
- Protected area/reserve management of important nesting beaches;
- Strengthening of local capacity to implement conservation programs on nesting beaches; and
- Strengthening law enforcement capacity and forensics skills through training and equipment.

Applicant organizations should be conducting project work directly on populations occurring outside the United States, or the results of research should have direct bearing on and benefits for marine turtle populations outside the United States. Applied research projects should address specific management needs and actions.

II. AWARD INFORMATION

Due to the limited funds available, preference will be given to proposals requesting \$50,000.00 or less. The period of performance for the majority of projects funded under this initiative will be one year, starting on the date the award is signed by the U.S. Fish and Wildlife Service. Project proposals must be designed accordingly. Recipients of awards under this Fund are eligible to submit new proposals for follow-up or continuing projects on an annual basis. This Initiative uses grant agreements as the primary assistance instrument.

III. ELIGIBILITY INFORMATION

Eligible Applicants: Applications may be submitted by any government agency responsible for conservation and protection of marine turtles and any other organization or individual with demonstrated experience in marine turtle conservation. New U.S. Government-wide policy requires all applicant organizations, both domestic and non-domestic, to apply for, and include a Dun & Bradstreet Data Universal Number System (DUNS) number on their application. Applicant organizations without a DUNS number should go to <https://eupdate.dnb.com/requestoptions/government/ccrreg/>. Please contact Ms. Jean Schlegel, U.S. Fish & Wildlife Service at jean_schlegel@fws.gov with any problems

encountered in obtaining a DUNS number. **Applications will not be considered eligible for funding until the applicant provides a valid DUNS number.**

Ineligible Activities: The Division of International Conservation will not fund: the purchase of firearms or ammunitions; buying of intelligence information or paying informants; gathering information by persons who conceal their true identity; law enforcement operations that prompt suspects to carry out illegal activities so they may be arrested (entrapment); or any activity that would circumvent sanctions, laws or regulations of either the U.S. or the country in which the activity would occur.

Matching Funds: Applicants and/or other project partners must contribute funds to the project, which may include cash or in-kind contributions.

IV. APPLICATION AND SUBMISSION INFORMATION

Requesting an Application Package: : Information on this program can be found at the Grants.gov website: <http://www.grants.gov/search/basic.do>. This Request for Proposals, which includes links to all application forms and instructions, can be found at <http://www.fws.gov/international/grants/grants.html>. Paper copies of the Request for Proposals can be obtained by contacting the Division of International Conservation at the address/telephone number below.

Date for Proposal Submission: This program has two annual deadlines.

The first deadline is **November 1** each year. We strongly encourage applicants with nesting season projects beginning April/May to submit proposals on or before the November 1 deadline.

The second deadline is **April 1** each year. We strongly encourage applicants with nesting season projects beginning September/October to submit proposals on or before the April 1 deadline.

Submission Instructions: MAIL one unstapled copy of the complete proposal and attachments to:

Attn: Marine Turtle Conservation Fund
U.S. Fish and Wildlife Service
Division of International Conservation
4401 North Fairfax Drive, Room 730
Arlington, Virginia 22203-1622 USA
Telephone: 703-358-2125

APPLICATION FORMAT AND CONTENT: PROPOSALS MUST BE SUBMITTED IN ENGLISH. All proposals should include the following:

A. Project Summary

The project summary should be no more than one page in length. It should include the title of the project, geographic location, a brief description of the need for the project, goal(s), objectives, specific project activities, beneficiaries and expected products.

B. Project Narrative

- 1. Statement of Need:** Discuss why it is important that this project be implemented and include supporting information. Discuss previous or on-going efforts of other international, national, regional and/or local organizations or individuals relevant to the conservation need to be addressed by your project.
- 2. Project Goals and Objectives:** Project goals must be clearly defined and directly relevant to the need(s) identified above. Project objectives must be measurable, realistic (attainable within the project's period of performance), and be directly relevant to the goals identified.

3. **Project Activities, Methods and Timetable:** Discuss in detail all proposed project activities and describe the method(s) to be used to implement the objectives. Include a timetable indicating roughly when activities or project milestones will be accomplished. Any tables, spreadsheets or flowcharts should be incorporated into the narrative text (do not include as a separate attachment).
4. **Stakeholder Coordination/Involvement:** Discuss efforts taken to coordinate with and involve local resource managers and other relevant organizations or individuals in planning your project. Discuss efforts to coordinate with other international, national, regional and/or local stakeholders working on projects relevant to your proposed project.
5. **Anticipated Benefits and Outputs:** Describe all expected products/outputs to result from the project (examples include: management plans/brochures/posters/training manuals produced, people trained, workshops held, hours of training provided, patrols conducted). Once identified, describe the impact of the outputs on the targeted resource. Include details on how the products will be distributed to resource managers, researchers and other interested parties.
6. **Project Monitoring and Evaluation:** All projects must incorporate monitoring and evaluation plans, based on the stated anticipated benefits and outputs and ensure that the products will reach the intended beneficiaries. Describe how the proposed project will be monitored and evaluated, and how project participants and beneficiaries will participate in these activities.
7. **Sustainability:** As appropriate, discuss the potential for financially sustaining the project activities beyond the life of a one-year award under this program.
8. **Description of Organization(s) Undertaking the Project:** Provide a brief description of the applicant organization, as well as all cooperating organizations and agencies, including staff and other resources available for the project. Brief (1-2 pages) *curricula vitae*, identifying the qualifications and capacity of all key project personnel to meet the project objectives, should be submitted with the proposal (see the Proposal Application Checklist at the end of this section).
9. **Project Budget Table: Begin your project budget table on a new page.** All costs should be presented in U.S. dollars. The budget table should have one column for the requested FWS funding, and one or more columns for applicant and partner contributions. Rows should represent all cost categories, and associated amounts, for the anticipated funding period of one year. An example budget table format:

Item	FWS	"Applicant"	"Partner X"	"Partner Y"	Total
Total					

Indirect Costs: Applicants are encouraged to keep indirect costs to a minimum. Although a NICRA rate is not a requirement to apply under this Fund, all applicants with Negotiated Indirect Cost Rate Agreements (NICRA) should include a copy as an attachment to their proposal (see Proposal Application Checklist). Applicants with NICRA rates may request less than their negotiated rate and/or contribute indirect costs as a match, if they so choose.

10. **Budget Justifications:** Justification must be provided for all requested budget line items. Justifications must demonstrate a clear connection to project activities, and should clarify how line item amounts were determined. For example, a \$3,300 line item for lodging costs can be demonstrated as a formula: *20 nights x 11 people x \$15/night = \$3,300 requested for lodging*. Justifications for personnel salary should be well documented, including the base-line salary

figure and the estimate of time (percent) to be directly charged to the project. Assistance to cover personnel salaries is generally given a lower priority.

- 11. Governmental Endorsement:** Non-governmental applicants should include a recent letter of support, referencing the specific proposal by title, from the appropriate local, regional, or national government wildlife or conservation authority (see Proposal Application Checklist).

12.

PROPOSAL APPLICATION CHECKLIST

TO BE CONSIDERED COMPLETE, <u>ALL PROPOSALS</u> MUST INCLUDE:	
✓	Project Summary and Narrative
✓	Letter of Governmental Endorsement
✓	Brief curricula vitae (1-2 pages) for key personnel
✓	A complete, signed copy of each of the following required forms:
	• SF 424- Application for Federal Assistance http://www.whitehouse.gov/omb/grants/sf424.pdf
	• SF 424a- Budget Information http://www.whitehouse.gov/omb/grants/sf424a.pdf
	• Standard Form 424b- Assurances http://www.whitehouse.gov/omb/grants/sf424b.pdf

PROPOSALS FROM U.S. APPLICANTS* MUST ALSO INCLUDE:

- | | |
|---|--|
| ✓ | A copy of your organization's Negotiated Indirect Cost Rate Agreement, if applicable |
|---|--|

****(APPLICANTS OUTSIDE THE U.S. DO NOT SUBMIT THESE ITEMS)***

Failure to provide complete information, as outlined above, may cause delays, postponement or rejection of a grant application.

V. APPLICATION REVIEW

Review Criteria: To be considered for funding, proposals must address one or more of this program's priority areas, listed above in the Description of Funding Opportunity. The Division of International Conservation ranks proposals by scoring how well each proposal addresses the program priority areas, and how well each proposal addresses the requested elements listed in the Application and Format section above. High priority, well-justified projects that address all of the requested proposal elements will receive higher scores. These scores are not the sole determining factor for final funding decisions. While considering the ranking factor scores, projects are further prioritized for funding based on the degree to which they:

- Make a significant contribution to the protection, maintenance and/or enhancement of important populations of the target species and/or their habitats;
- Act as a catalyst for activities in a previously neglected area with potential significant conservation value;
- Address an emergent issue with potential significant conservation value;
- Utilize requested funds in an efficient, cost-effective manner to accomplish project objectives;
- Build upon complementary activities of other organizations/individuals in a manner which will lead to efficient, effective conservation of the resource;
- Conduct activities that do not duplicate other on-going activities;
- Address a conservation need identified by a specialist group, or by a regional, national or global strategy;
- Conduct activities that will be harmonious with international, national and/or regional conservation priorities, action plans and/or strategies;
- Implement an important element of a larger scale/scope project that would provide synergetic value;
- Apply the best scientific and technical information available in support of project activities;

- Provide training essential to the development of local capacity to implement conservation activities;
- Provide project management experience to local personnel, strengthening the local capacity to manage conservation programs;
- Include the participation of local people in the project activities, or otherwise contributes to local empowerment;
- Promote networking, partnerships and/or coalitions;
- Provide for the development of a demonstration activity that can be replicated for widespread use;
- Implement activities or provide benefits that have the potential to be sustained beyond the life of the grant.

The above considerations are not listed in any order of importance. All considerations listed do not necessarily apply to every proposal.

VI. AWARD ADMINISTRATION

Award Notices: Following review, successful applicants can expect to receive written notice, most often transmitted by e-mail, from the FWS Project Officer assigned to the project. Successful applicants may be requested to provide revisions to the project scope and/or budget before an official Assistance Award is issued. Successful applicants will also be informed of the approximate date they can expect to receive the Assistance Award document, which may be sent via courier mail (FedEx, DHL, Airborne Express). Unsuccessful applicants can expect to receive written notice, most often transmitted by e-mail, within 30 days of the final review decision.

Administrative and National Policy Requirements: Click on the link to review this Fund's *Assistance Award Guidelines* at <http://international.fws.gov/pdf/MNSCF05AAG.pdf> which explains the policies applicable to awards made under this program. Paper copies of this document are also available upon request at the address/telephone number listed in Section IV above. Additionally, new U.S. Government-wide policy requires all applicant organizations, both domestic and non-domestic, to apply for, and include a Dun & Bradstreet Data Universal Number System (DUNS) number on their application. Applicant organizations without a DUNS number should go to <https://eupdate.dnb.com/requestoptions/government/ccrreg/>. Please contact Ms. Jean Schlegel, U.S. Fish & Wildlife Service at jean_schlegel@fws.gov with any problems encountered in obtaining a DUNS number.

Reporting: At a minimum, each grant recipient is required to submit a final performance report and a final financial status report, identifying all expenditures, due at the end of the project period. Project specific reporting requirements, including expected reporting frequency, are included in the text of the Assistance Agreement. See this Initiative's *Assistance Award Guidelines* at <http://international.fws.gov/pdf/MNSCF05AAG.pdf> for reporting format and content requirements.
